Better use of Android quick setting tile Deployed

- M Marty
- **Forum name:** #Suggestion

Hi PIA,

I've been happily using your service for years now, and have one tiny suggestion I feel would make a huge difference on the android platform.

The quick settings tile, that quickly toggles the VPN connection on/off on android devices, when long pressed, opens the app info screen (usage, storage, notification, etc. android app details)

I've found myself long-pressing the tile many times to open the app from any screen quickly, which I'm soon reminded doesn't do that. I feel this would be a small but valuable tweak to the client.
